

## RoHS3 Compliance

### **EU DIRECTIVE 2011/65/EU and 2015/863/EU Restriction of Hazardous Substances Directive (RoHS3)**

The Restriction of Hazardous Substances (RoHS) Directive places rules upon European manufacturers of electrical and electronic equipment. The Directives' aim is to reduce the impact that electronic devices have on the environment.

The RoHS2 EU Directive 2011/65/EU (Article 3, [24]) defines "Control and Monitoring Equipment" specifically as "*industrial monitoring and control instruments means monitoring and control instruments designed exclusively for industrial or professional use*".

RoHS3 EU Directive 2015/863/EU, Annex II, states

*The restriction of DEHP, BBP, DBP and DIBP shall apply to ... monitoring and control instruments, including industrial monitoring and control instruments, from 22 July 2021.*

The careful design and manufacturing policy of Michell Instruments Ltd's products already ensures that the substances specified within the (RoHS2 and RoHS3) EU Directive do not appear within its products, or, where they may do so, are below the permitted limits.

Michell Instruments Ltd confirms that its products are in full compliance with the terms of the RoHS2 EU Directive 2011/65/EU and RoHS3 EU Directive 2015/863/EU.

Michell Instruments Ltd continues to monitor suppliers and material sources to ensure that compliance is maintained through supplier certifications and the information here is provided to the best of our knowledge.
